PRAMOD SANTOSH SADEKAR

Python Developer | AWS & DevOps

9156620538 | pramodsadekar76@gmail.com | LinkedIn | GitHub | Solapur, Maharashtra

PROFESSIONAL SUMMARY

Python Backend Developer with hands-on experience in Python, Django, Django REST Framework, REST APIs, SQL, and database management. Experienced in developing backend applications, building REST APIs, integrating AI/ML features, and working with MySQL and PostgreSQL. Hands-on experience with AWS, Docker, Kubernetes (Basic), Terraform, Linux, and GitHub Actions for CI/CD. Familiar with Generative AI, Large Language Models (LLMs), and ChatGPT API integration. Strong interest in troubleshooting, problem-solving, application support, and learning new technologies.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Backend Development: Django, Django REST Framework, REST APIs

Databases: MySQL, PostgreSQL

Cloud & DevOps: AWS (EC2, RDS, S3, VPC, IAM, CloudWatch), Docker, Docker Hub, Kubernetes (Basic), Terraform, GitHub Actions (CI/CD),

AI / Machine Learning: Machine Learning, Generative AI (Basic), Large Language Models (LLM), ChatGPT API Integration

Operating Systems: Linux

Tools & Version Control: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

AWS Cloud Intern — First Quad Tech Solutions | Hybrid

May 2026 – Present

- Developed and deployed Django-based web applications on AWS.
- Worked with AWS services including EC2, RDS, S3, VPC, IAM, and CloudWatch; monitored application and cloud resources using CloudWatch.
- Managed Docker containers for application deployment.
- Automated cloud infrastructure provisioning using Terraform and implemented CI/CD pipelines using GitHub Actions.

Django Backend Developer — CloudRegex Infotech Pvt. Ltd. | On-site

Feb 2026 – Present

- Developed backend applications using Python, Django, and Django REST Framework.
- Designed and integrated REST APIs for frontend-backend communication.
- Implemented CRUD operations, authentication, and backend business logic.
- Worked with MySQL and PostgreSQL databases; integrated AI/ML features into web applications.

AI/ML Intern — Indian Institute of Technology Kanpur | Remote

Feb 2025 – May 2025

- Developed AI/ML projects using Python and applied machine learning algorithms to real-world datasets.
- Worked with Generative AI (GenAI) and basic Large Language Model (LLM) concepts.
- Built and integrated chatbot applications using the ChatGPT API.

PROJECTS

DevOps Automation & Cloud Deployment — First Quad Tech Solutions

- Deployed the Django application on AWS using Docker; created Docker images and managed application containers.
- Automated AWS infrastructure provisioning using Terraform.
- Configured basic Kubernetes resources for container management and used Docker Hub as a container image registry.
- Implemented CI/CD using GitHub Actions to automate deployment from GitHub to the AWS environment.

PerfectStay – Accommodation Booking Platform — CloudRegex Infotech Pvt. Ltd.

- Developed a full-stack accommodation booking platform using Django.
- Built REST APIs for frontend-backend communication; implemented user authentication and secure backend functionality.
- Integrated Razorpay payment gateway for online payments.
- Implemented accommodation booking, discount, and user notification functionality using a relational database.

EDUCATION

Bachelor of Technology – Computer Engineering

Vidya Pratishthan College of Engineering, Baramati, Maharashtra | *2023 – 2027*

CERTIFICATIONS & TRAINING

Data Analytics Trainer — Makbridge Technologies

Trained diploma students in Excel, SQL, Power BI, Python, Pandas, NumPy, Matplotlib, Seaborn, Databricks, and basic Machine Learning.

Backend Development — Apna College

Completed backend development training covering Python, backend development, databases, APIs, and web application backend development.

Pandas — Simplilearn

Learned data cleaning, manipulation, analysis, aggregation, and visualization using Pandas.
